

WELCOME TO

# EVAA PROTOCOL

**Lending and borrowing on  
TON is just a TON of fun!**

# The Problem with TON Lending and Borrowing

- **No opportunity to do lending and borrowing on TON**
- **Users cannot earn passive income or access liquidity**
- **Trading and earning on TON are limited**

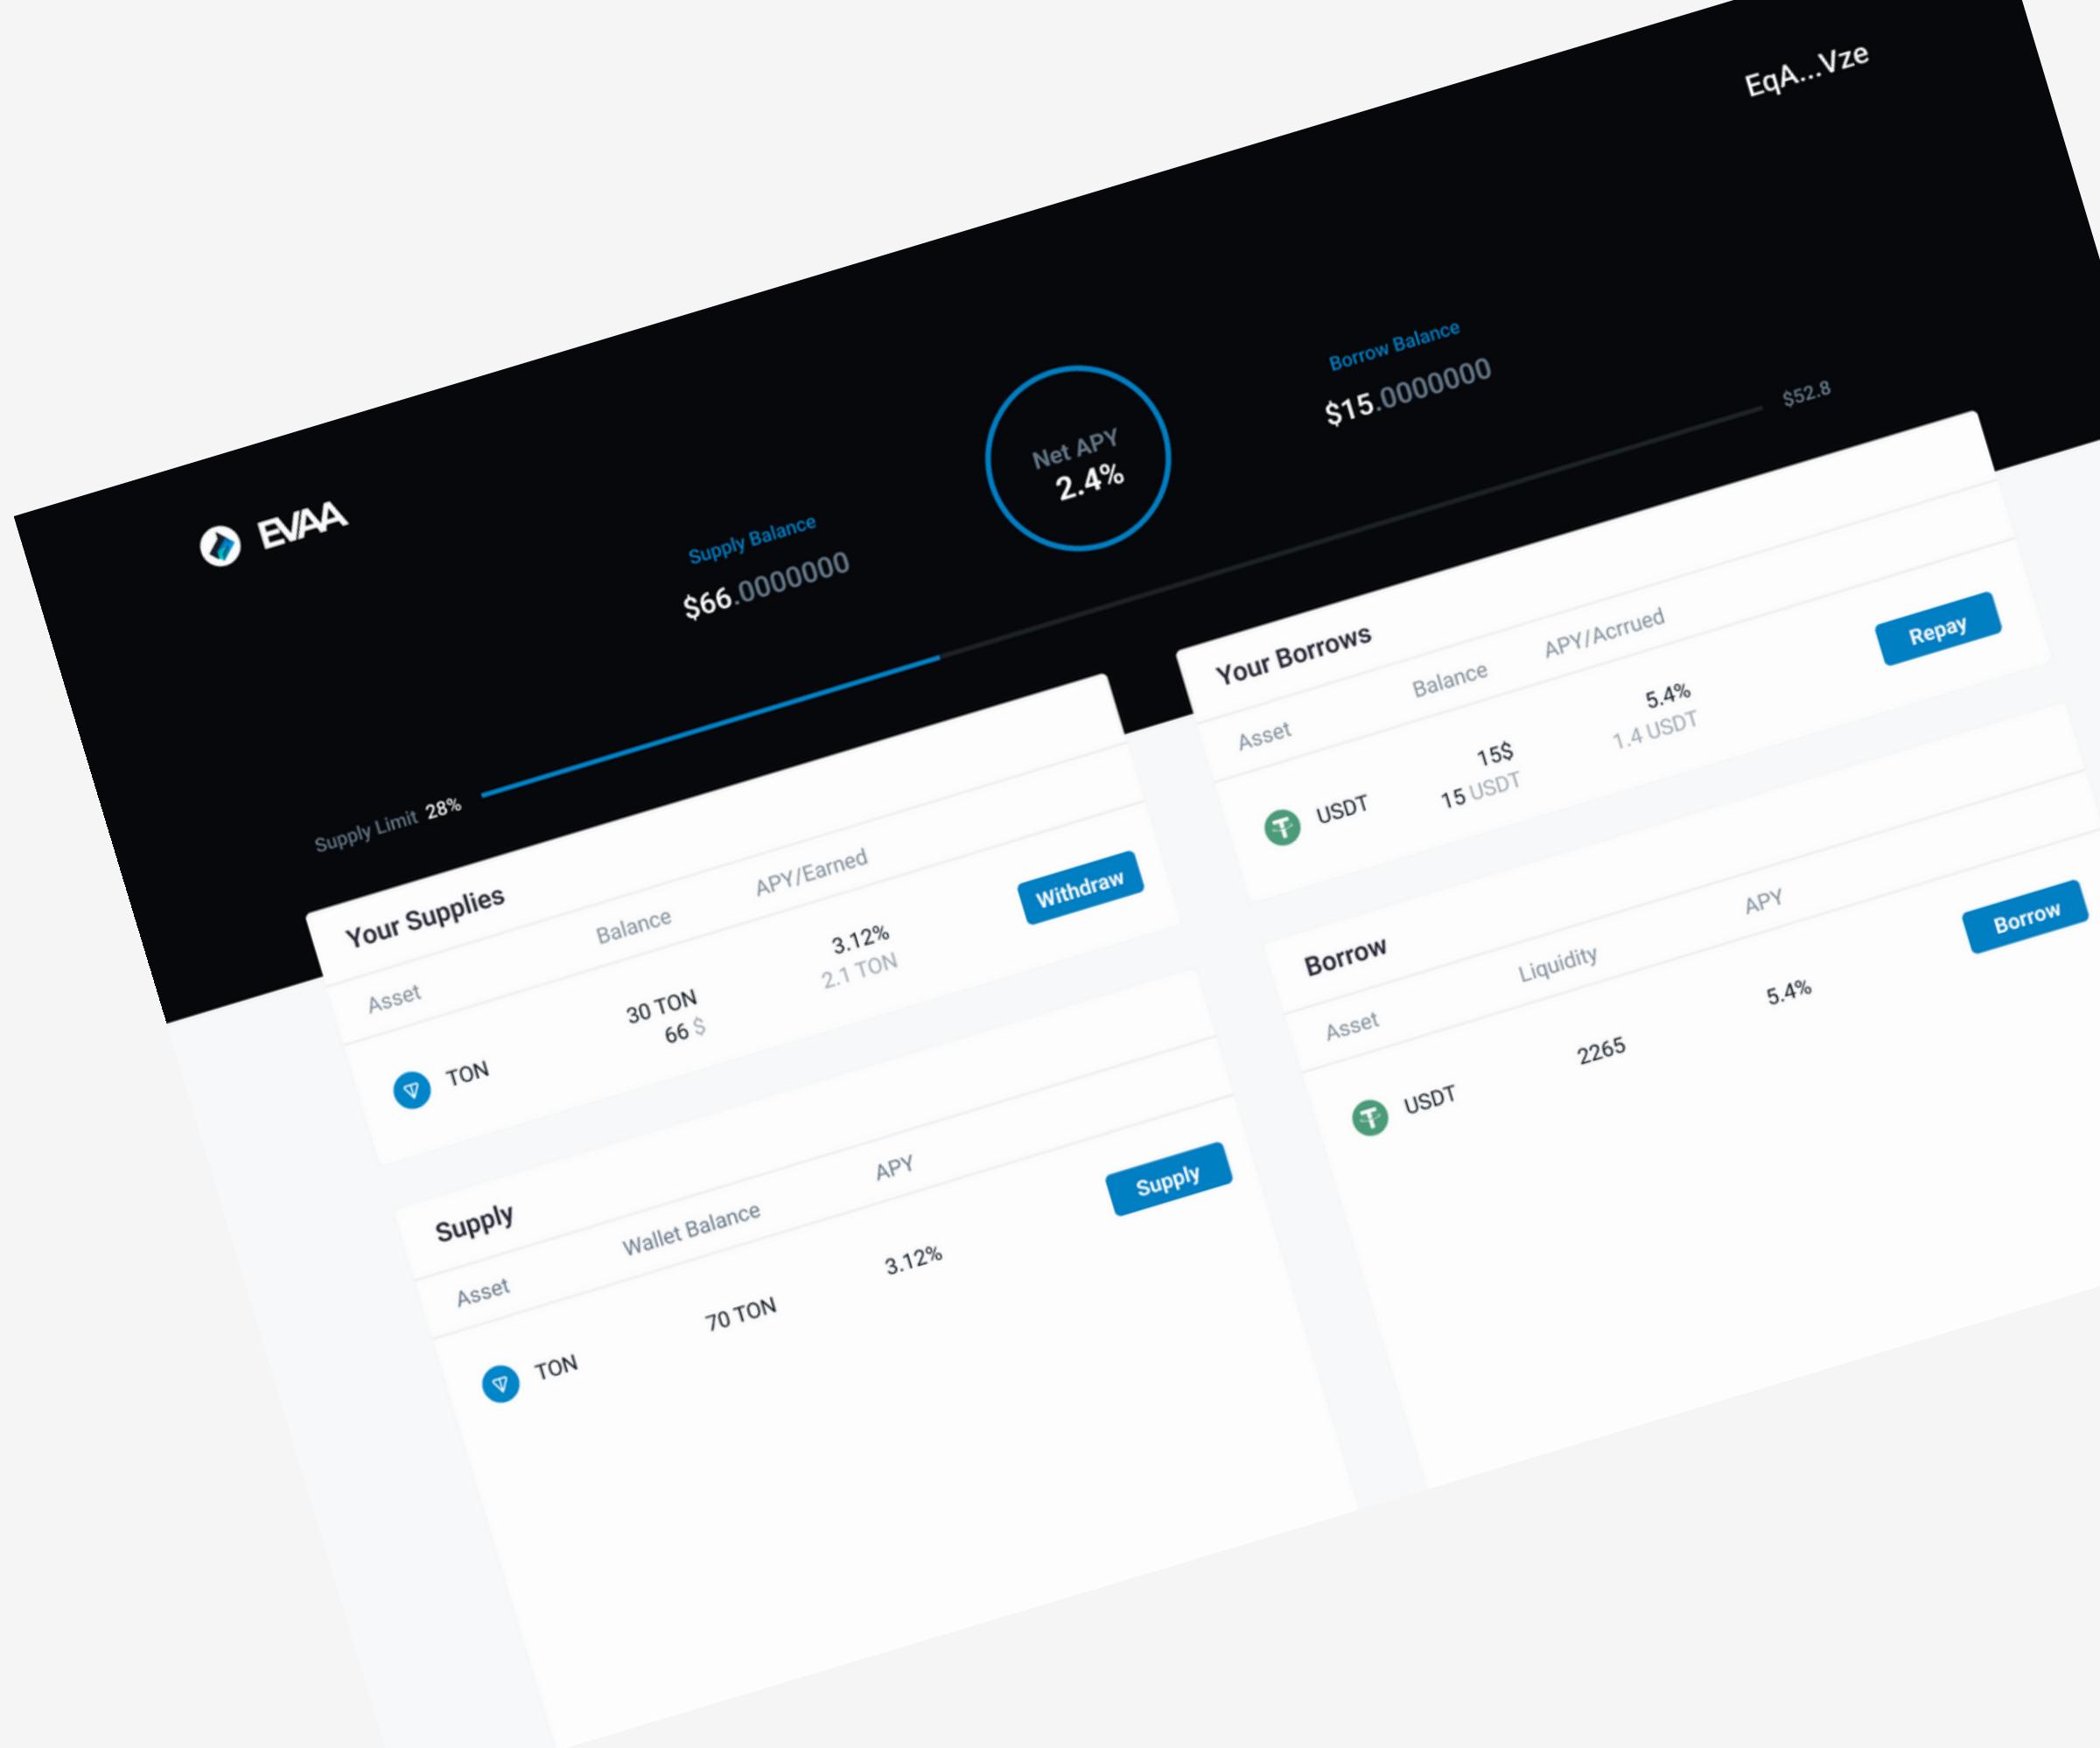

# The Solution

## What is Evaa (EVAA)?

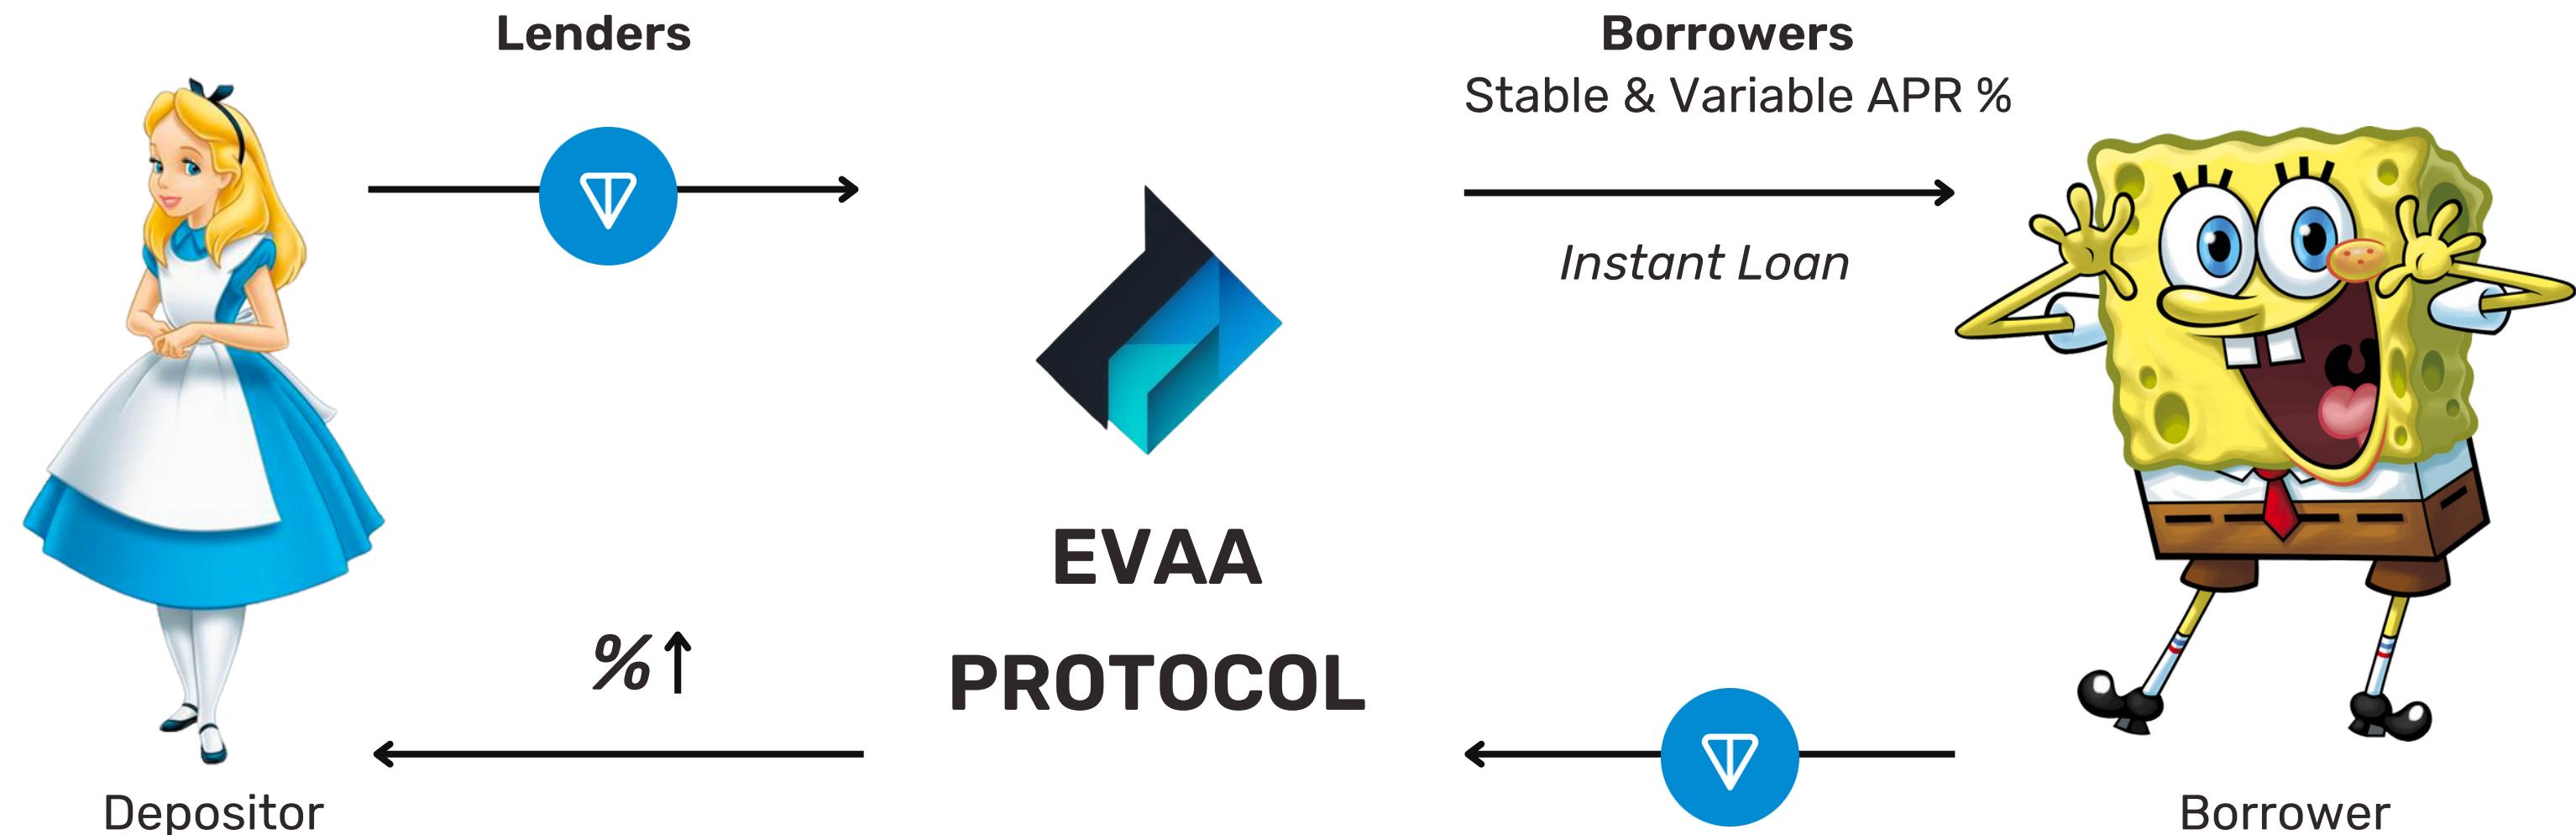

Evaa is a decentralized lending protocol that allows people borrow and lend cryptocurrencies.

## What makes Evaa unique?

Besides the independent stablecoin the protocol allows people to work with native TON assets as well as wrapped tokens.

# The Solution

Lenders who contribute liquidity to a protocol can earn passive interest on their contributions

Borrowers who have collateral can take out a loan from a protocol instantly

## We Bring **TON Lending To Life**

**The Evaa Protocol is built on the idea  
of creating a decentralized lending  
and borrowing protocol on TON**

- The first lending protocol on TON
- The easiest way for lending and borrowing
- Get ready to earn passive income and access liquidity

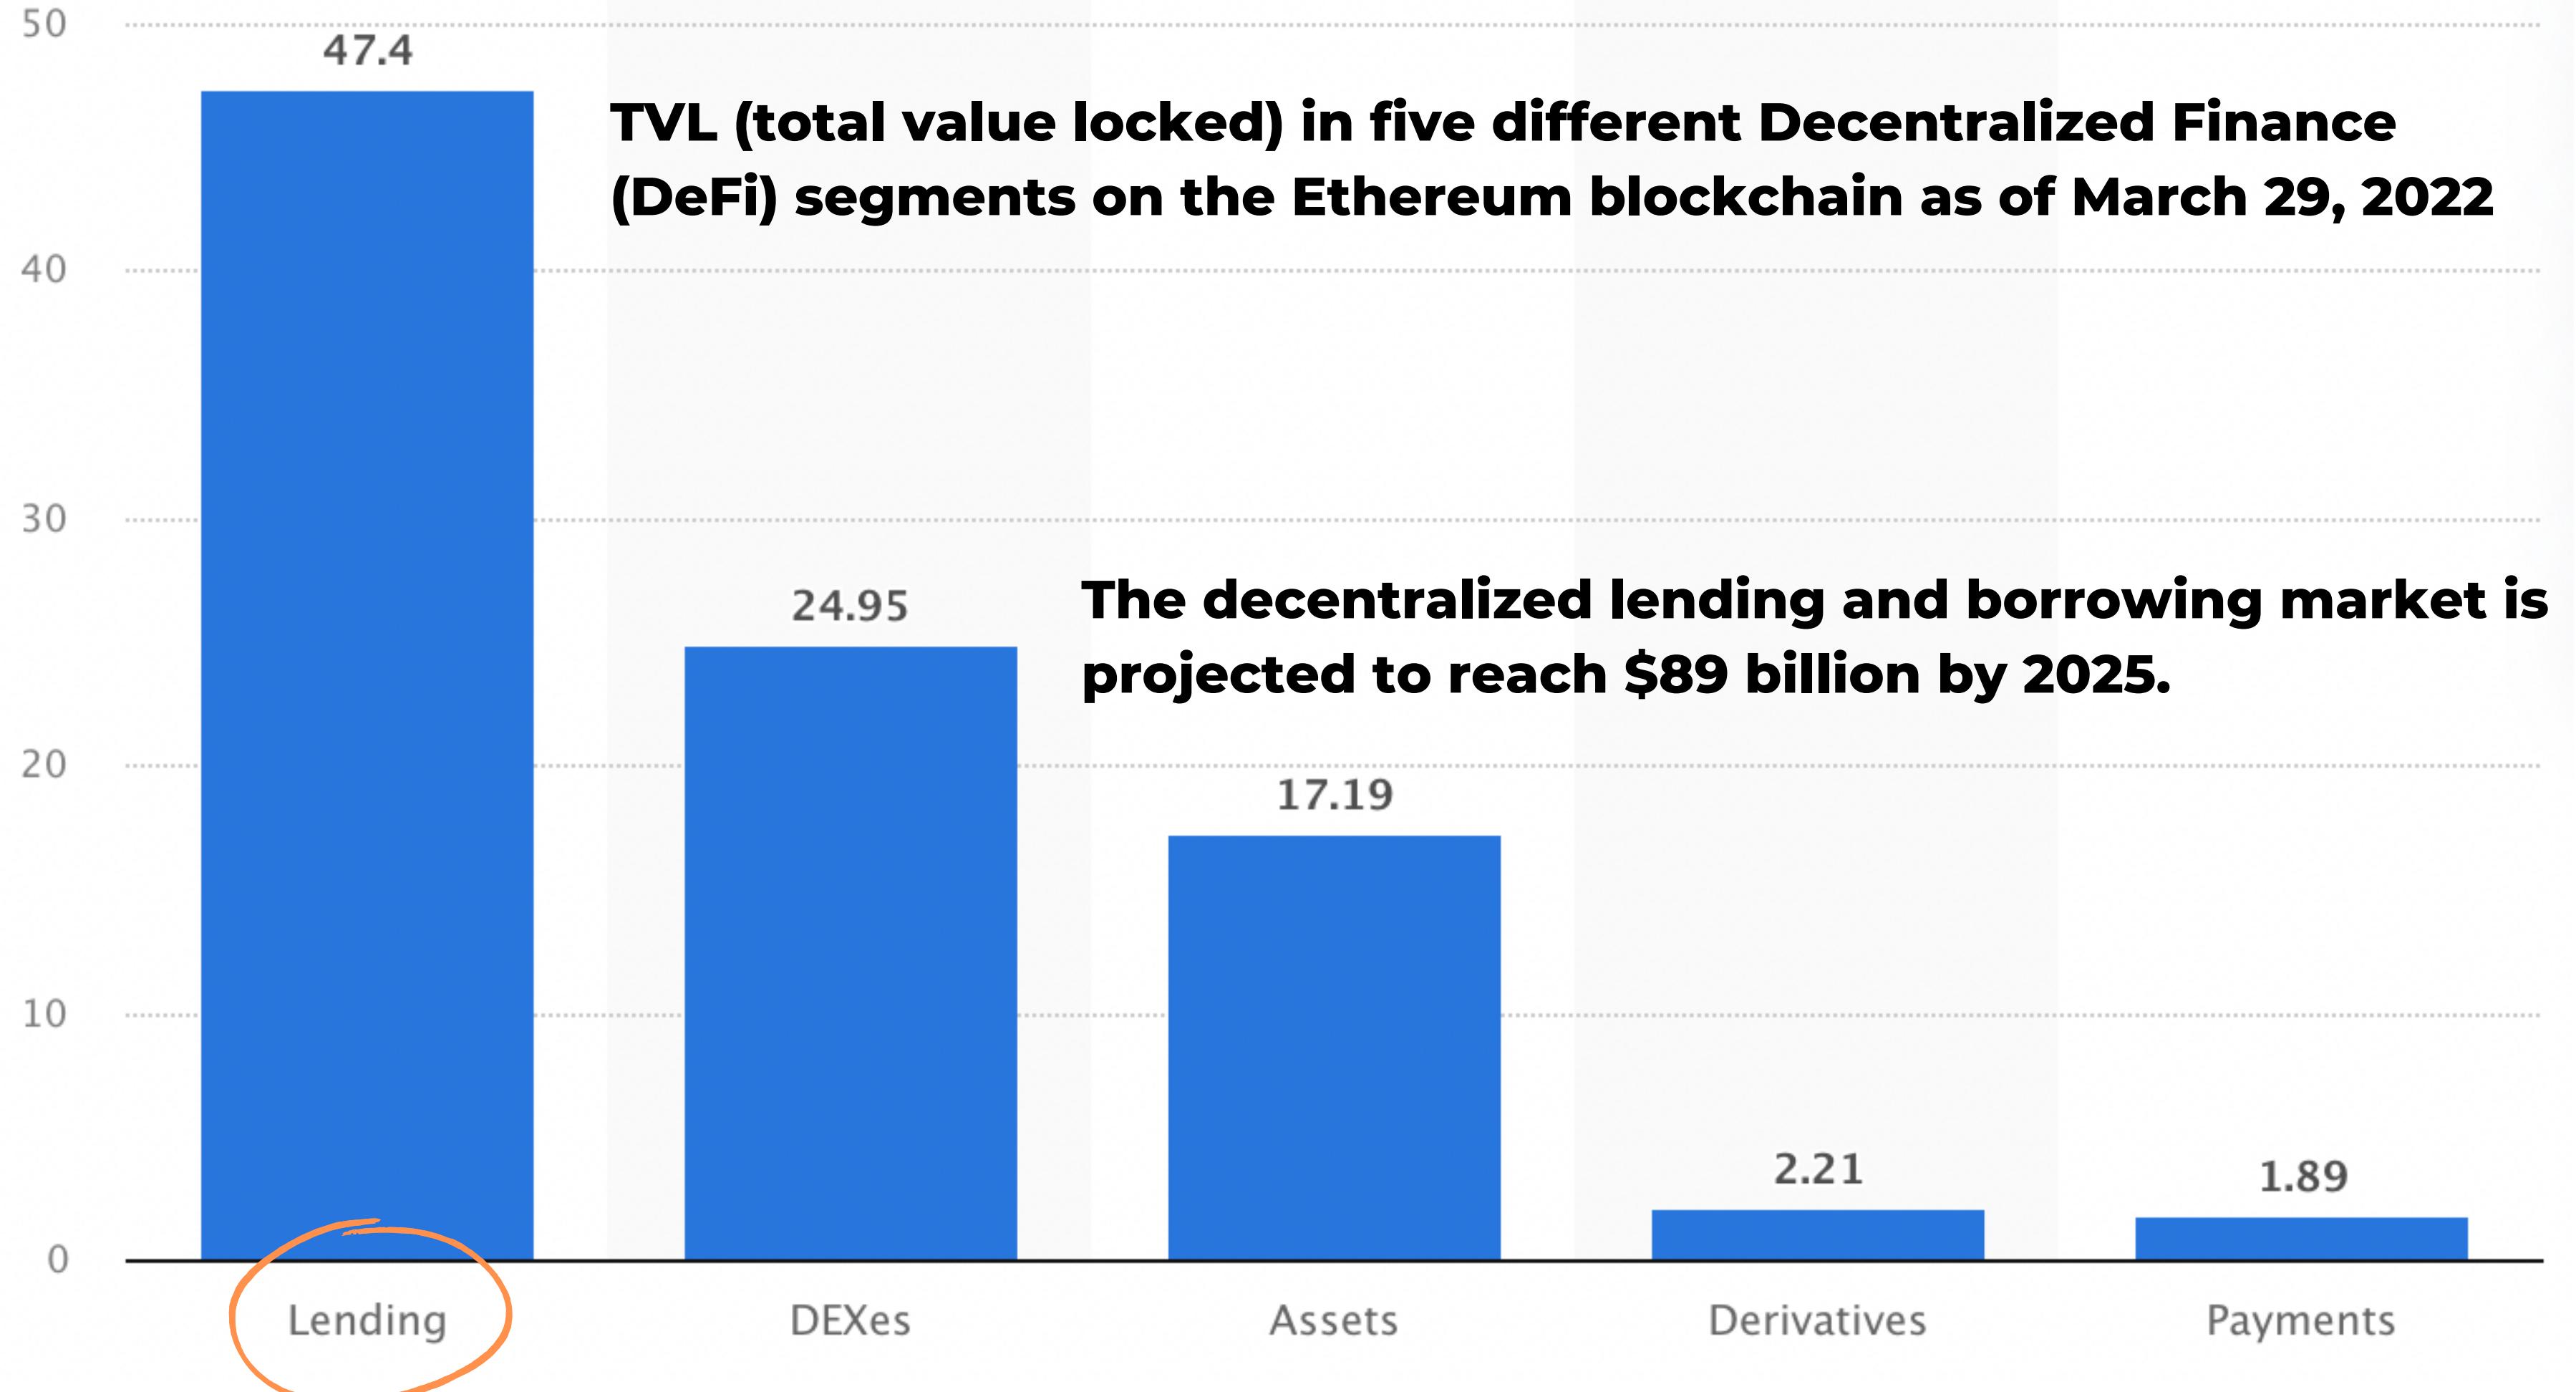

# Market Validation and Why Now

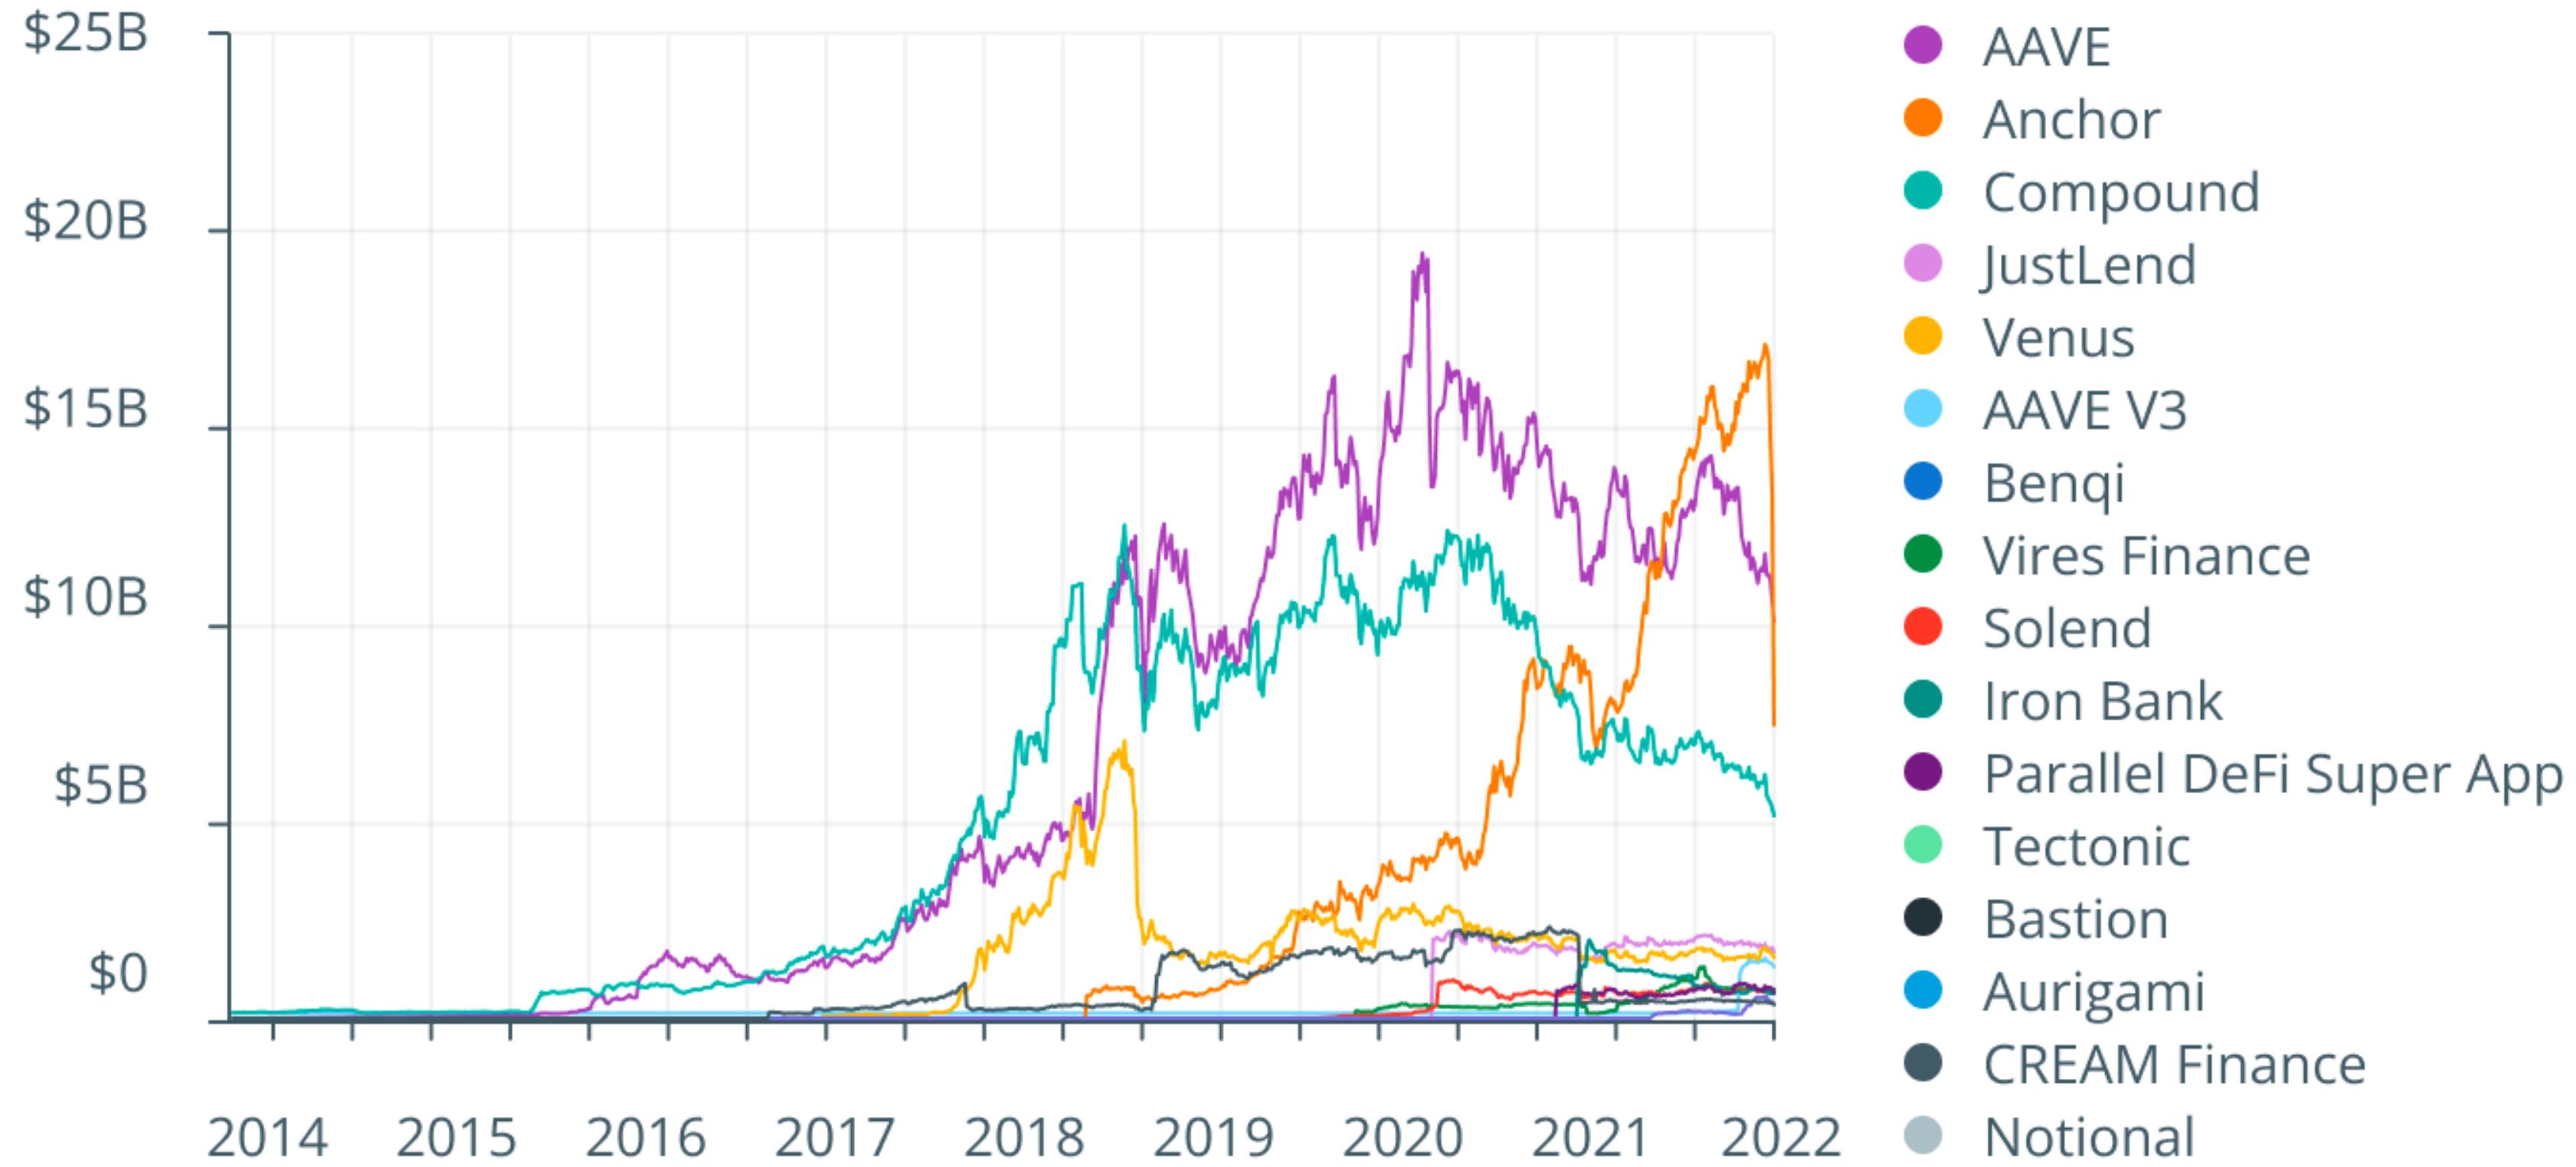

- First on the market - No competitors in the TON ecosystem
- Big niche - Every blockchain has its own successful lending protocols such as Compound (ETH), Solend (Solana), and Burrow (NEAR)

# Market size

# Value locked in lending protocols

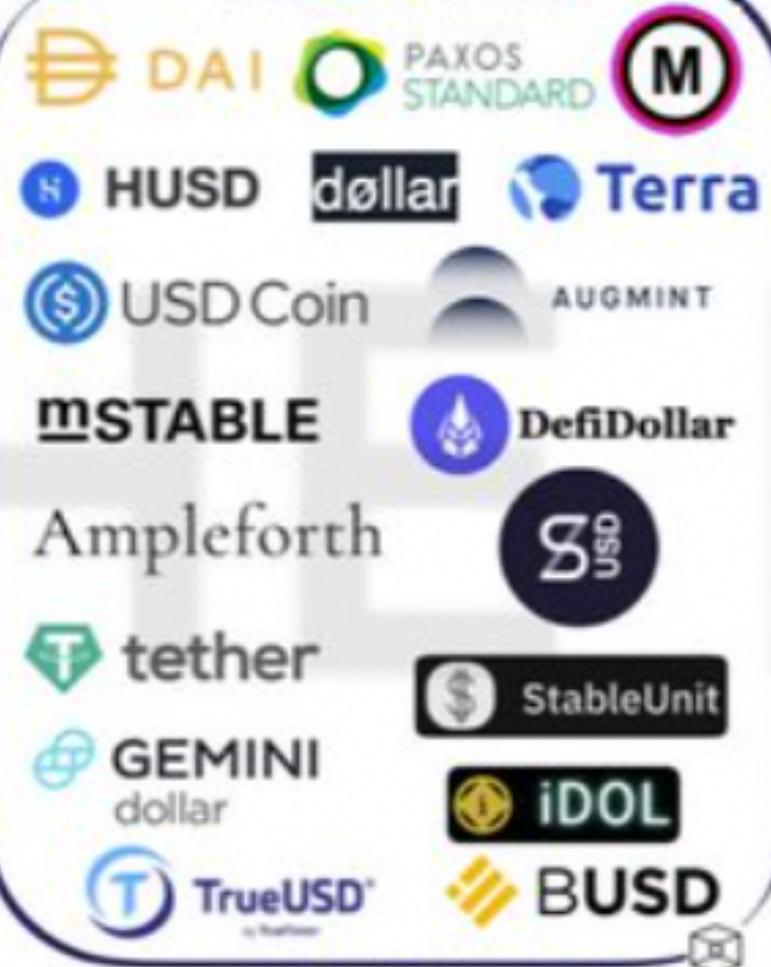

## DeFi ecosystem on Ethereum

### Credit & Lending

### Stablecoins

### Exchanges & Liquidity

### Exchanges

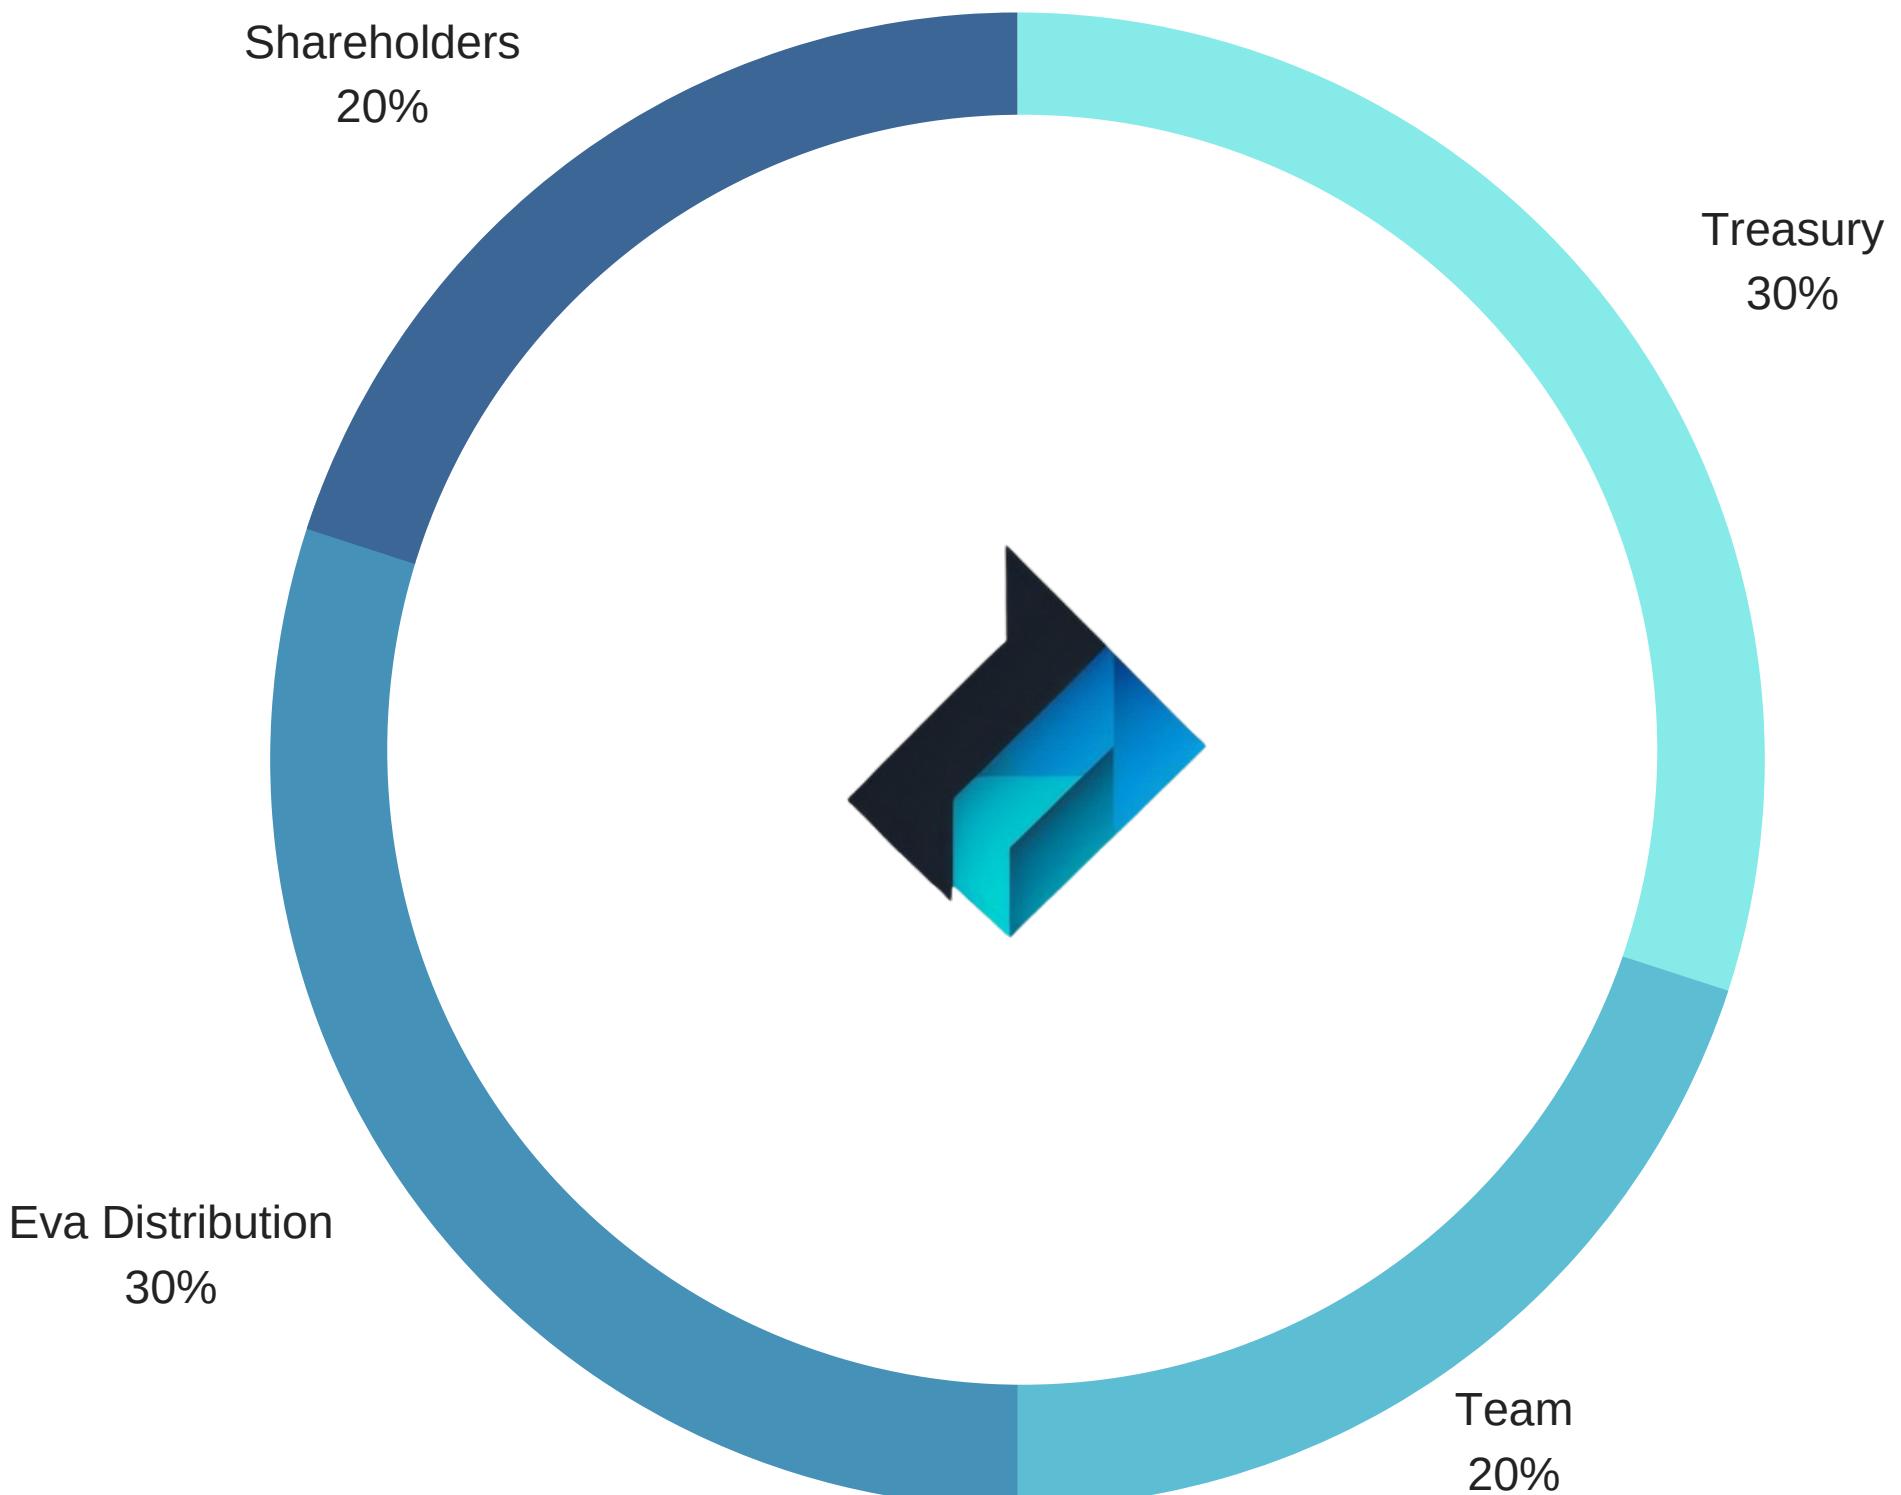

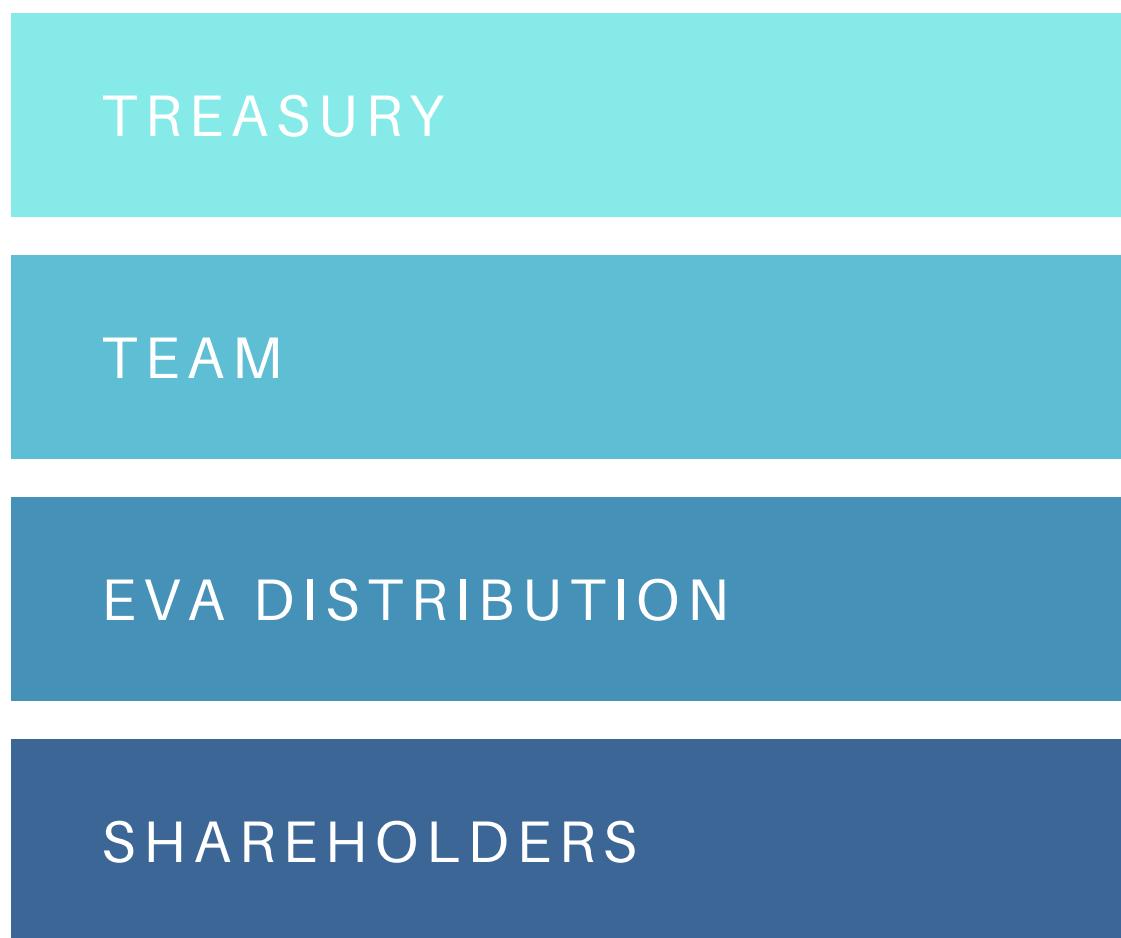

# Business Model

Commission from operations

- Lending
- Borrowing

# Tokenomics

# **Competitive advantage**

- The team has established **partnerships with key players in TON**
- We know **FunC - TON Smart Contract Language**
- The big **vision of a stablecoins framework**
- **Integration in Telegram Messenger**
- **Very Good Timing**

# Roadmap

- **Build the first working version with one wrapped stablecoin**
  - oUSDT (Orbit Bridge USDT)
- **Add other assets**
  - oBTC (Orbit Bridge BTC, Bitcoin)
  - tETH (Tonana Bridge ETH, Ethereum)
  - and others
- **Build our own stable coin and convert everyone to it**
- **Integrate DAO Governance**

# Partnership

Lending  
/

DEXs

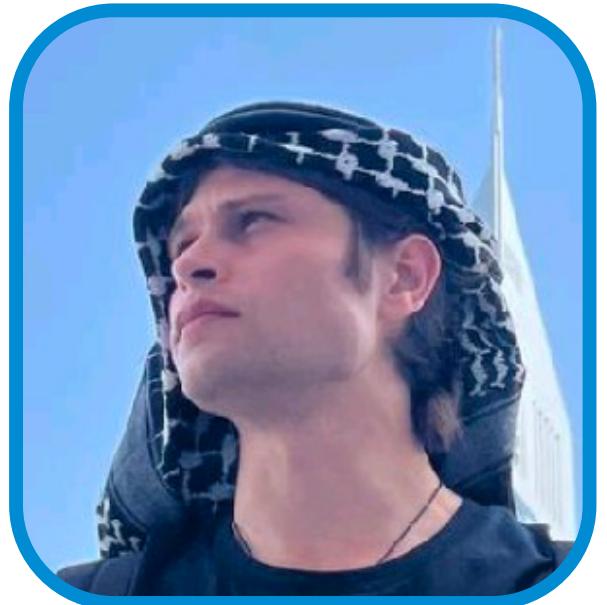

# Funding goal

Our fundraising goal is **\$100K-\$230K** through the **SAFT/SAFE** for the next 6 months to cover

- marketing
- development
- operational costs

# Founding team

## ARTEM

Biz Dev, PM  
CTU, CS  
Blockczech  
TON Ambassador

## ALEXANDER

PM, Full Stack Dev  
Charles University, CS  
Hack-a-TON x Prague Winner

## VLADISLAU

Full Stack Dev  
TON Cells, Tonana  
TON Smart Contract Challenge

## EUGENE

CULS  
Project Manager  
Dev Rel  
Tonana  
Quilt
